

SOUTH AFRICAN ENERGY CRISIS

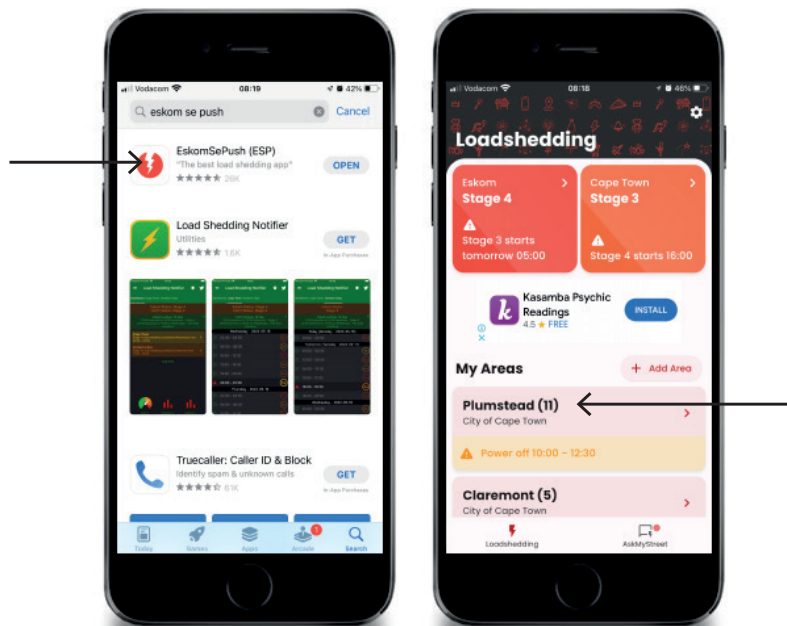

South Africa has been experiencing one of the worst energy crisis in the region in years. It is affecting millions of people across the country. The nation's aging coal-powered electrical stations are not coping with demand. This has resulted in staged loadshedding.

At Kaya La Provence your room has an inverter which provides you with power for:

- wifi
- watching TV
- a lounge light

Unfortunately cooking or utensils that require power from plugs is not possible.

DOWNLOAD THE APP ESKOM SE PUSH
to know what times load shedding will be taking place.

Download the app
called Eskom se Push

When the app is open
enter your area:

**PLUMSTEAD
(ZONE II)**

The times for
load shedding will then
be displayed.
